1 **Appendix E** provides the data supporting the resource analysis in **Chapters 2** and **3**. Each
2 section of the appendix contains supporting data for the analysis of the affected environment
3 and potential environmental consequences of the alternatives. As demonstrated in the table
4 below, the appendices are generally numbered to coincide with their **Chapter 3** counterpart.
5 **Appendix E2** is numbered to coincide with its counterpart, which is **Chapter 2**. Some of the
6 resource analyses in **Chapter 3** did not require supplemental information. For these sections,
7 there is a placeholder in the appendix to keep the subsection numbering consistent with
8 **Chapter 3**.
